MANUFACTURER'S QUALIFICATIONS

Holocom is the leading manufacturer of Category 2 Hardened Carrier protected distribution systems (PDS) for SIPRNET and other classified networks transmitting national security information (NSI). Holocom's innovative product suite includes the Holocom PDS raceway and connectors, which is a complete end-to-end hardened carrier solution, with an array of different raceway sizes. Additionally, Holocom has various sized enclosures, that along with the Holocom PDS, meet the requirements outlined in the national security guidance for PDS, CNSSI No. 7003 (September 2015), when installed by manufacturer certified installers. Holocom supports its products with a worldwide network of installation partnerships and services tailored to meet individual customer requirements. Holocom owns an intellectual property (IP) portfolio protecting its secure enclosure systems and raceways, which in turn protect mission-critical networks for all branches of the military, federal agencies, and private networks across the globe. Holocom products are MADE IN THE USA, and is headquartered in Tempe, AZ. Holocom has been designing, selling, and manufacturing PDS products since 2002, and non-secure telecommunication pathway systems and enclosures since 1994.
