HOLOCOM[®] ANNOUNCES HIGH CAPACITY RACEWAY FOR SIPRNET

(SAN DIEGO - November 9, 2010) Holocom, the leader in protective distribution systems (PDS) for SIPRNet and other classified networks, announced its newest PDS product—Secure Large Carrier™. Secure Large Carrier™ is a two-piece, large caliber raceway offering customers more than seven times the cable capacity of industry standard Holocom 2" x 2" Secure Raceway.

Secure Large Carrier™ is constructed of powder-coated, galvanized steel and holds up to 200 CAT 6 cables, making it the perfect backbone carrier for home run cable design systems. Secure Large Carrier™ incorporates the same patented locking technology as Holocom 2" x 2" Secure Raceway allowing reentry into the system for moves, adds, and changes as well as true visual inspection of cabling and connections.

“As SIPRNet use continues to expand, Holocom looks for ways to reduce the cost associated with its implementation,” said John Burns, Holocom CEO. “By adding this large size option to our suite of cable carriers, customers can now match their cable count requirement to the most efficient carrier. Also, like all Holocom products, Secure Large Carrier™ was designed from an installer’s perspective. There are fewer components and no exposed mounting brackets or screws. This reduces installation time and cost and improves security for SIPRNet.”

Secure Large Carrier™ integrates with Holocom’s two other cable carriers, 2" x 2" Secure Raceway and Secure Mini Dukt™. Secure Large Carrier™ measures 6" x 3.5" and is supplied in five-foot sections in a 20-foot kit.

To learn more about the individual components in the Secure Large Carrier™ product suite, visit <http://holocom.com/products/SecureLargeCarrier1of2.html>.
